

MoMo
from MTN

Maximum Velocity, As One

Fintech **Summit** 2026

Welcome — here's the plan

1 Welcome & Rules

Theme, tracks, the 24-hour flow and the ground rules everyone plays by.

2 API & Framework

A technical walkthrough of MoMo Payment APIs and the Mini App Framework.

3 Judging Brief

How you'll be scored, the finals format, and the special category awards.

Please silence phones during the walkthrough — you'll use them to submit scores later.

PART 1

Welcome & Opening

The theme, the challenge tracks, and the rules of the game.

THE THEME

From payments app to a Super App

Your idea. Millions of users. One platform.

Built for scale across Africa

MoMo is evolving into a digital platform where customers discover, access, and pay for everyday services in one place. This hackathon invites you to build Mini Apps — powered by MoMo APIs — that deliver seamless, practical, and scalable experiences.

Solve real problems

Target genuine everyday customer needs, not prototypes.

Drive repeat engagement

Build habits that keep customers coming back to MoMo.

Unlock the ecosystem

Show how integration connects services across markets.

CHOOSE YOUR CHALLENGE

Four ways to build

Track 1 • Everyday Essentials

Effortless daily payments — electricity, water, internet and utilities.

“Kill the queues. Remove the friction.”

Track 2 • Entertainment & Lifestyle

Gaming, events, streaming and food delivery experiences.

“Turn engagement into habit.”

Track 3 • Travel & Mobility

Discover, book and pay for flights, transport and travel.

“One app. One payment. Zero interruptions.”

Wildcard • Future of MoMo

Any game-changing Mini App that fits the Super App vision.

“If it solves a real problem, we want to see it.”

Hard requirements & fair play

NON-NEGOTIABLE REQUIREMENTS

-  **Built using MoMo Payment APIs**
-  **Designed for genuine daily use**
-  **Ready to scale across African markets**

THE 24-HOUR GROUND RULES

-  **In-person & overnight**
Build on-site for the full 24 hours — 2 Sept 09h30 to 3 Sept 12h00.
-  **Your own work only**
No remote or outside assistance. All code written on-site by your team.
-  **Live demo required**
MoMo API must be core and demonstrated live, not just described.
-  **Score independently**
Judges score by the rubric — every team seen by at least three judges.

PART 2

MoMo API & Mini App Framework

A technical walkthrough of the platform you'll build on.

What you're building on

Mini App Framework

The runtime that hosts your app inside MoMo — UI shell, lifecycle, and native device access.

MoMo Payment APIs

Collections, disbursements, and payment status — the money-movement core of every Mini App.

Auth & Security

OAuth tokens, sandbox keys, and consent flows that keep customer transactions safe.

Marketplace Pipeline

Submission, review and publishing — the path from prototype into the MoMo ecosystem.

Your integration path in 5 steps

01

Get sandbox keys

Register your team and generate API credentials in the developer portal.

02

Scaffold the Mini App

Spin up the starter template on the Mini App Framework.

03

Wire up payments

Call the Collections / Disbursements APIs and handle status callbacks.

04

Test in sandbox

Simulate transactions end-to-end before touching real flows.

05

Demo live

Show a working payment journey inside MoMo to the judges.

Mentors and MoMo Partner Engineers are on the floor throughout — raise a hand at any step.

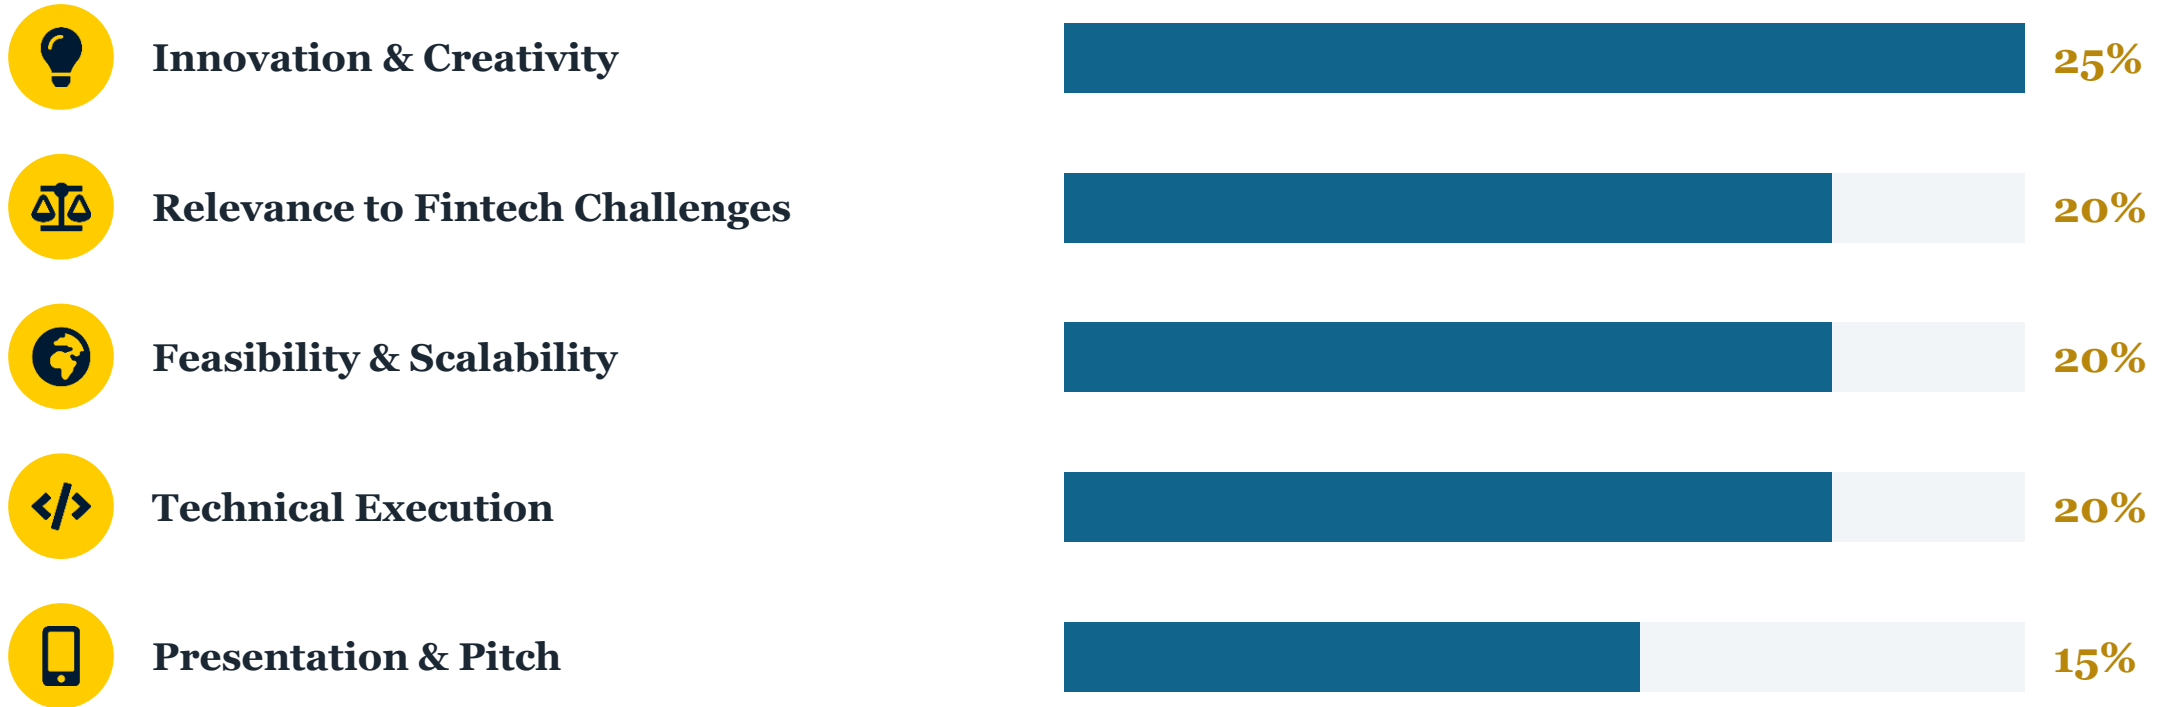

PART 3

Judging Criteria & Charter

How you're scored, how the finals run, and what you can win.

HOW YOU'RE SCORED

The weighted rubric — 100 points

Weighted score = $(\text{Inn} \times 25 + \text{Rel} \times 20 + \text{Fea} \times 20 + \text{Tec} \times 20 + \text{Pre} \times 15) \div 100$ — the Form calculates it for you. Just enter the five ratings.

THE FORMAT

How judging runs

ROUND 1 · SHORTLIST

Pitch your track

- ✓ 2–3 min pitch + 1 min live demo
- ✓ Scored within your assigned track
- ✓ Top 3 per track advance
- ✓ Every team seen by ≥ 3 judges

ROUND 2 · FINALS

Nine finalists, one stage

- ✓ 9 finalists pitch to the full panel
- ✓ Panel decides overall 1st / 2nd / 3rd
- ✓ Special category awards nominated
- ✓ Winners announced at closing

WHAT YOU CAN WIN

Awards & recognition

OVERALL WINNERS

SPECIAL CATEGORY AWARDS · 5 LAPTOPS

Best Innovation

Most original and creative solution.

Best MoMo API Integration

Most effective use of MoMo APIs.

Local Impact

Best solves a local market challenge.

Future Builder

Strongest long-term scale potential.

Judges' Choice

Exceptional overall performance.

■ Partners/Sponsors

MORE THAN A HACKATHON

The best solutions move from prototype to production

Marketplace Pipeline

Fast-tracked into MoMo's review pipeline.

Partner Engineers

Paired with MoMo Partner Engineers.

Prototype to Production

Supported on the journey to launch.

Super App Ecosystem

A place in the future MoMo Super App.

Let's build. The clock starts now.
